5. Write a precis of the following passage to one third of the original length and also give a suitable title. (Score : 4)

Today there are 3000 million people in the world. Fifty years ago about 2000 million people lived in it. If earth's population were evenly distributed over its land surface, there would be about 550 persons to the square mile. But earth has vast areas of forest, mountains and deserts which are almost totally inhabited. On the other hand it has great cities each with millions of people living in a few square miles.

To feed the fast growing population of our earth, scientists and planners have to discover new ways to produce more. One possible way is to bring more land not under cultivation. This can be done only in places where there is lot of land used for productive purposes. In many places it is no longer possible as all the available land is already cultivated. A second way is to make use of new types of seeds to produce more. Already a number of new strains of paddy and wheat have been developed in different parts of the world. India is one of the countries where a lot of useful work has been done in the field of agriculture research.

21. Read the following poem and prepare a critical appreciation.

How Did you Die?

Did you tackle that trouble that came your way

with a resolute heart and cheerful?

or hide your face from the light of day

With a craven soul and fearful?

Oh, a trouble's a ton, or a trouble's an ounce,

Or a trouble is what you make it,

And it isn't the fact that you're hurt that counts,

But only how did you take it?

You are beaten to earth? Well, Well what's that?

come up with a smiling face.

It's nothing against you to fall down flat,

But to lie there _____ that's disgrace

~~The harder you're thrown, why the higher you bounce.~~

Be proud of your blackened eye!

It isn't the fact that you are licked that counts,

It's how did you fight and why?

And though you be done to the death, what then?

If you battled the best you could

If you played your part in the world of man,

Why, the critic call it good.

Death comes with crawl, or comes with a pounce,

And whether he's slow or spy,

It isn't the fact that you're dead that counts,

But only how did you die?
